

# Felipe Rodrigues Ascari

Senior Software Engineer · Go · AWS · Distributed Systems

Brazil (Remote) | felipeascari@gmail.com | linkedin.com/in/felipe-ascari | felipeascari.dev

## SUMMARY

Senior engineer with 15+ years building and operating distributed systems in production, in **Java** for over a decade and in **Go** since 2022. Currently at **Sticker Mule**, on the AI-platform team. Background includes **McGraw Hill** (serverless pricing workflows processing **2.17M requests** at Apdex 0.99) and **Mercado Livre** (a **3.7M-shipment/day** logistics pipeline at LATAM scale).

## SKILLS

### PROGRAMMING

Go TypeScript / Node.js Java Solidity SQL

### BACKEND

Event-Driven Microservices DDD Clean Architecture gRPC GraphQL Kafka / NATS

### CLOUD

AWS (Lambda, SQS/SNS, ECS/Fargate, Step Functions) Azure Kubernetes Terraform GitHub Actions Docker

### DATA & OPS

PostgreSQL Redis DynamoDB MongoDB Prometheus Grafana Datadog OpenTelemetry New Relic

### AI TOOLING

Agentic Workflows LLM APIs (Claude, Grok) GitHub Copilot OpenAI Codex

## EXPERIENCE

- Senior Software Engineer, Sticker Mule** · USA, Remote · Jul 2026 - Present
  - Part of a small, autonomous team building in **Go**, **TypeScript**, **React**, **GraphQL**, and **Postgres** on **GCP**, powering the model layer behind AI-powered features for an ecommerce platform used in 40+ countries.
- AI Expert Trainer, xAI** · via micro1, Remote · Apr 2026 - Jun 2026 (Contract, Part-time)
  - Evaluated **Go** repositories and ranked model outputs from **Grok** and **Claude Opus**, submitting original Go projects as evaluation benchmarks for model training data.
- Senior Engineer, McGraw Hill** · USA, Remote · Sep 2024 - Jul 2026
  - Architected a DDD-based **Go** pricing engine from scratch to replace offer logic fragmented across four sources, cutting pricing errors by **30%** and manual operational effort by **40%**.
  - Designed serverless **AWS** workflows to replace manual financial processes, using **Lambda**, **SQS/SNS**, and event-driven state machines with custom **New Relic** dashboards. The service processed **2.17M requests in 6 months** at **Apdex 0.99**.
- Senior Engineer, Mercado Livre** · Brazil, Remote · Jan 2022 - Sep 2024
  - Built a **TypeScript** BFF to aggregate and decorate data from **Mercado Envíos** and **Mercado Pago** backends, serving frontend clients and partner systems through a consistent API contract. Coordinated shipping forecast and payment flow integrations across LATAM's largest marketplace.
  - Built event-driven **Go** microservices for the **Mercado Envíos** logistics pipeline shipping **3.7M items per day across LATAM** within a squad p99 budget of 100-200ms. Led technical reviews and owned the full lifecycle of critical shipment flows.
  - Owned the package-vs-vehicle cost calculation for the daily logistics plan, replacing spreadsheets with systematic carrier contract analysis that eliminated unnecessary truck reservations.
- Software Architect, Ambev Tech** · Brazil, Remote · May 2021 - Jan 2022
  - Operated fiscal document issuance (CT-e, MDF-e, NF-e) across **AB InBev's** distribution network: **89 centers**, **207 distributors**, and **1M points of sale**. Led a migration to Azure cloud and completed security remediation to **AB InBev** standards.
- Software Architect / Senior Developer, Betha Systems** · Brazil, On-site · Jan 2010 - May 2021
  - Progressed from senior developer to architect over 11 years, leading technical and architecture decisions across engineering teams, including **3 years** as dedicated architect for one product squad across 6 core municipal finance modules.
  - Designed and operated government financial systems for **850+ municipalities** across **23 states**, covering accounting, treasury, and fiscal transparency. Enforced engineering quality gates with 0% critical defects and 80%+ test coverage.
  - Migrated from J2EE monoliths to a multi-tenant cloud architecture serving **3,000+ public agencies** without interrupting active fiscal operations.

## WRITING & OPEN SOURCE

Publishes technical articles on **Go internals**, concurrency, and OpenTelemetry at [felipeascari.dev](#), Medium, dev.to, and LinkedIn. Built **cashback-platform**, a Go monorepo that issues ERC-20 cashback tokens on Ethereum using go-ethereum, Solidity, NATS JetStream, and gRPC. Built and maintains **ai-config**, a library of agentic AI workflows and LLM tooling.

## EDUCATION

Postgraduate in Software Engineering, IPG, Brazil · 2011-2013

B.Sc. in Information Systems (Honorable Mention), University of Southern Santa Catarina, Brazil · 2006-2009

Languages: Portuguese (Native) · English (Professional Working Proficiency) · Spanish (Intermediate)
