Felipe Rodrigues Ascari

Brazil (Remote) | felipeascari@gmail.com | linkedin.com/in/felipe-ascari | fascari.github.io

SUMMARY

Senior Software Engineer and Technical Writer with 15+ years building high-throughput distributed systems in **Go**, **PostgreSQL**, **Redis**, **Docker**, and **Kubernetes**. Background in Fintech and Crypto core services, event-driven architectures, and cloud infrastructure (AWS, Azure). Builds **AI-assisted development workflows** with GitHub Copilot CLI, Claude, and MCPs. Strong English communication, comfortable working remotely.

THOUGHT LEADERSHIP & TECHNICAL WRITING

Author of technical articles on Medium and LinkedIn (fascari.github.io) covering **Go internals**, **concurrency patterns**, and **observability** (OpenTelemetry in Go). Built cashback-platform, a Go monorepo issuing cashback as ERC-20 tokens on Ethereum via go-ethereum and Solidity, with NATS JetStream and gRPC. Also maintains ai-config, a public collection of custom Copilot CLI skills, instructions, and Claude workflows.

SKILLS

Languages: Go / Golang (Goroutines, Channels, Context), TypeScript, Node.js, SQL, Solidity, Java

Infrastructure & DevOps: Docker, Kubernetes, AWS (Lambda, Step Functions, SQS, SNS, S3, ECS, Fargate, Parameter Store, CloudWatch), Azure, Kafka, Terraform, GitHub Actions, CI/CD

Testing: Unit Testing, Integration Testing, Testcontainers, Mockery, Table-Driven Tests

Backend & Architecture: Microservices, Event-Driven Architecture (EDA), GraphQL, gRPC, DDD, Clean Architecture

Databases: PostgreSQL, Redis, DynamoDB, MongoDB, Oracle, MySQL

Observability: Datadog, Kibana, Prometheus, Grafana, NewRelic, OpenTelemetry

AI Tooling: GitHub Copilot CLI (custom skills, orchestration), Claude, MCPs, Obsidian (Zettelkasten), Graphify, prompt engineering

PROFESSIONAL EXPERIENCE

Senior Engineer · McGraw Hill Educational (USA), Remote — Sept. 2024 – Present

- Built a high-concurrency **Go** rule engine with worker pools and channels, cutting pricing errors by 30% and speeding up promotion rollouts.
- Designed serverless workflows with AWS Lambda, Step Functions, SQS, and SNS, automating financial processes and reducing manual workload by 40%.
- Introduced distributed tracing and structured logging, reducing MTTR by 25%.
- Created 20+ custom **GitHub Copilot CLI skills** for code analysis, system design, implementation, and code review. Built persistent AI memory with Obsidian (Zettelkasten) and codebase knowledge graphs with Graphify, integrated with Claude and MCPs for daily workflow.

Senior Engineer · Mercado Livre (Brazil), Remote — Jan. 2022 – Sept. 2024

- Built high-throughput event-driven microservices in **Go**, cutting response times by 35% on logistics workflows handling millions of daily requests.
- Wrote a **TypeScript** BFF to unify service integrations, reducing client-facing latency by 20% and improving mobile app performance.
- Worked with Mercado Pago on financial flows involving Meli Dolar (MUSD), a stable cryptocurrency used for cashback and balance operations at scale.
- Led RFC reviews and technical mentoring, raising team delivery consistency and reducing post-release defects by 15%.

Software Architect · Ambev Tech (Brazil), Remote — May 2021 – Jan. 2022

- Delivered CT-e and MDFe transportation document systems supporting nationwide logistics at Ambev (AB InBev group).
- Eliminated 100% of critical SonarQube alerts and led migration from on-premises infrastructure to Microsoft Azure.

Software Architect / Senior Developer · Betha Systems (Brazil), On-site — Jan. 2010 – May 2021

- Designed modular fiscal and tax microservices for municipal clients, cutting support tickets by 20% through better data validation and error handling.
- Led migration from legacy monoliths to Spring Boot microservices with **PostgreSQL**, increasing deployment frequency from monthly to daily. Earlier work focused on core financial and ERP modules with **Oracle and PostgreSQL** optimization.

***Earlier roles · Sistema Info, Ciasoft (Brazil)*, On-site** — 2005 – 2009

- Built logistics ERP systems for transportation companies and municipal property tax platforms for city governments.

EDUCATION

Postgraduate in Software Engineering, IPG, Brazil, 2011–2013

B.Sc. in Information Systems (Honorable Mention), University of Southern Santa Catarina, Brazil, 2006–2009

Technical Degree in Systems Analysis, SATC Technical School, Brazil, 2002–2004

LANGUAGES

Portuguese (Native) · **English (Professional Working Proficiency)** · Spanish (Intermediate)
