

Felipe Rodrigues Ascari

Senior Go Engineer · Distributed Systems · Financial Infrastructure

Brazil (Remote) | felipeascari@gmail.com | linkedin.com/in/felipe-ascari | felipeascari.dev

SUMMARY

Senior **Go** engineer with 15+ years in distributed systems and financial infrastructure. Joined **Mercado Livre** to return to hands-on engineering at LATAM scale after an architecture role at Ambev. Integrated **Mercado Envíos** and **Mercado Pago** to serve **3.7M shipments per day** within a p99 budget of 100-200ms. Currently at **McGraw Hill**, building serverless financial workflows on AWS that have processed **2.17M requests** at Apdex 0.99.

SKILLS

PROGRAMMING	Go	TypeScript / Node.js	Java	Solidity	SQL			
BACKEND	Event-Driven	Microservices	DDD	Clean Architecture	gRPC	GraphQL	Kafka / NATS	
CLOUD	AWS (Lambda, SQS/SNS, ECS/Fargate, Step Functions)			Azure	Kubernetes	Terraform	GitHub Actions	Docker
DATA & OPS	PostgreSQL	Redis	DynamoDB	MongoDB	Datadog	OpenTelemetry	New Relic	Grafana
AI TOOLING	Agentic Workflows		LLM APIs (Claude)		GitHub Copilot			

EXPERIENCE

- Senior Engineer, McGraw Hill Educational** · USA, Remote · Sep 2024 - Present
 - Designed the **Go** API for consolidated pricing from scratch to replace a model fragmented across four sources. This gave the commercial team direct control over offer logic. Unit, integration, repository, and handler tests gate every deploy.
 - Designed serverless **AWS** workflows to replace manual financial processes. Used **Lambda**, **SQS/SNS**, and event-driven state machines with custom **New Relic** dashboards for APM throughput and p95/p99 latency tracking. The service processed **2.17M requests in 6 months** at **Apdex 0.99**.
 - Automated backport PRs on merge via **GitHub Actions** and shipped internal agentic tooling for code analysis and design review, cutting manual overhead from the release cycle.
- Senior Engineer, Mercado Livre** · Brazil, Remote · Jan 2022 - Sep 2024
 - Built a **TypeScript** BFF to aggregate and decorate data from **Mercado Envíos** and **Mercado Pago** backends, serving frontend clients and partner systems through a consistent API contract. Coordinated shipping forecast and payment flow integrations across LATAM's largest marketplace.
 - Built event-driven **Go** microservices for the **Mercado Envíos** logistics pipeline shipping **3.7M items per day across LATAM** within a squad p99 budget of 100-200ms. Led technical reviews across multiple delivery cycles and owned critical shipment flows on **Fury**, MELI's **Kubernetes** platform.
 - Owned the package-vs-vehicle cost calculation for the daily logistics plan, replacing spreadsheets with systematic carrier contract analysis that eliminated unnecessary truck reservations.
- Software Architect, Ambev Tech** · Brazil, Remote · May 2021 - Jan 2022
 - Operated fiscal document issuance (CT-e, MDF-e, NF-e) across **AB InBev's** Brazilian distribution network: **89 distribution centers**, **207 third-party distributors**, and **1M points of sale**. Led a strangler migration from on-premise data warehouse to Azure cloud. Completed application security remediation to meet **AB InBev** global standards.
- Software Architect / Senior Developer, Betha Systems** · Brazil, On-site · Jan 2010 - May 2021
 - Led technical and architecture decisions across teams of **3 to 6 engineers** for 11 years. For **3 years**, served as dedicated architect for one product squad, driving decisions across 6 core municipal finance modules. Managed critical technical analysis for incident resolution and roadmap planning.
 - Designed and operated government financial systems for **850+ municipalities** across **23 states**. These systems covered public-sector accounting, treasury management, trial-balance validation, account reconciliation, and fiscal transparency, processing millions of fiscal documents per month through high-volume electronic tax invoicing. Enforced engineering quality gates with 0% critical defects and 80%+ test coverage.
 - Migrated from J2EE monoliths to a multi-tenant cloud architecture serving **3,000+ public agencies** without interrupting active fiscal operations.

WRITING & OPEN SOURCE

Publishes technical articles on **Go internals**, concurrency, and OpenTelemetry at [felipeascari.dev](#), Medium, dev.to, and LinkedIn. Built **cashback-platform**, a Go monorepo that issues ERC-20 cashback tokens on Ethereum using go-ethereum, Solidity, NATS JetStream, and gRPC. Built and maintains **ai-config**, a library of agentic AI workflows and LLM tooling.

EDUCATION

Postgraduate in Software Engineering, IPG, Brazil · 2011-2013
B.Sc. in Information Systems (Honorable Mention), University of Southern Santa Catarina, Brazil · 2006-2009
Languages: Portuguese (Native) · English (Professional Working Proficiency) · Spanish (Intermediate)
